Gallaudet readying to host students in Arts Festival

How do you get more than 700 disabled kids arriving on buses, trains and planes from all over the country to the Gallaudet campus and assure that their luggage and chaperons get here at the same time?

How do you set off a huge fireworks display from the middle of the Potomac River?

How do you find enough foreign language interpreters so that 100 persons from 45 countries can communicate with each other?

Gallaudet will find out how these things are possible as it hosts students participating in the National Committee, Arts with the Handicapped (NCAH) 1984 National Very Special Arts Festival (VSAF) May 23-26.

According to Joy Majied, coordinator of the VSAF this year, the answer to these questions is "No problem," and she even wears a button on her blouse with those words printed on it. Her soft, hushed voice calmly dispenses directions and provides information to literally hundreds of staff members and volunteers who are beginning to troop in and out of 409 Benson Hall, the Festival office headquarters on campus until the event in May.

"Gallaudet has been so wonderful, so cooperative. I can't say enough good things about our reception on campus and the willingness of everyone to work with us to make this Festival a success," Majied said. "Dr. Jerry Lee, his wife, Joan, and Mrs. Jane Spilman, your Board Chairman, have given us their full support and are serving on our committee for the Festival."

As the event draws closer, the campus will be seeing many new faces, members of the planning committee staff and volunteers who are working on the thousands of details needed to

Joy Majied

A party was held April 19 at "Ole Jim" for seven retiring collegiate faculty members. Pictured are six of those faculty members, left to right, Richard Phillips, R. Orin Cornett, Sara Withers, Leon Auerbach, William Stokoe, Jr., and Jeanne Conway. Francis Higgins is not pictured. The party was sponsored by the Office of Academic Affairs.

Collegiate faculty meets for last time

Near the end of the final collegiate faculty meeting of the 1984-85 academic year, Vice President for Academic Affairs John Schuchman was asked to clarify some of the actions taken at the March meeting of the Board of Trustees. Concerns were expressed over the rumored establishment of a national hospital and the lack of clarity as to the length of term of the current Interim President. Schuchman explained that the Board has asked the College to investigate the possibility of establishing a national hospital and that at this time he had no comment on the term of the Interim President.

The collegiate faculty then passed a motion requesting that the Board of Trustees consult with the faculty before making any final decisions that affect Gallaudet College. Discussion followed as to the possibility of obtaining faculty representation at Board meetings. Further action on this matter is scheduled for the fall.

Members were elected for the faculty committees, including the new commit-

tee on compensation, at the meeting. Final results were not available at press time.

During the committee reports, Committee A presented two motions on the simultaneous method of communication evaluation. The committee was asking the full faculty for guidance in further work on this issue. After discussion, the motions were tabled until the next meeting in the fall by a vote of 54-45.

In other business, the faculty approved the list of 1984 graduates of the College, accepted changes in three courses currently offered and accepted the request of the Department of Business Administration to offer a new course in international marketing. It was announced that Awards Night is scheduled for May 3 at 7 p.m. Other discussion centered on the responsibilities of Committee B on Undergraduate Curriculum and the bylaws of the collegiate faculty.

The next faculty meeting will be scheduled for September.

Campus day care center just months away from opening

Gallaudet's operation of a day care facility, an idea discussed on campus for years, is just months away from becoming a reality.

"It's finally going to happen; the plans are under way," said LaVarne Hines, the College's director of Equal Employment Opportunity and Community Relations and chair of the Gallaudet Day Care Committee.

The five-member committee—composed of Hines; Barbara Bodner-Johnson, a professor in the Education Department; Peter Goodman, College facilities coordinator; Denise Sullivan, personnel manager; and Lori Kronick, developmental education specialist with Student Affairs—was established in February by Interim President Jerry Lee. The Board of Trustees' Committee on Resources gave the College the go-ahead in March to establish the facility, which Hines predicts will be open by mid-August on early September.

To operate out of the now-vacant Appleby Building, the facility will care for children between the ages of 2 and 6 whose parents either work or attend classes at Gallaudet. The fee will be \$50 a week for each child although the committee is now exploring the possibility of a sliding scale for parents with more than one child in the program. The committee is also looking at the possibility of providing after-school care for employees' children who attend KDES.

The center will be run by a staff of six—a program coordinator/head teacher, three teachers and three aides. In addition, Hines said the committee hopes the site will be used by Gallaudet students for internships and practica.

While the center's coordinator will develop the curriculum, Hines said the program will be "very structured—a valuable learning experience which will

Four visiting scholars engaged in research at Gallaudet

by Robert C. Johnson

The Gallaudet Research Institute's Center for Studies in Education and Human Development (CSEHD) is hosting four visiting scholars currently engaged in research here on various aspects of deafness.

Avraham Zwiebel is an Israeli psychologist who directs the Special Education Program at Bar-Ilan University in Tel Aviv, Israel. He has been working for several months with Kathryn Meadow and others at the CSEHD as they implement plans for a cross-cultural, longitudinal study of the

development of deaf infants and young children.

Zwiebel is setting the stage for Israeli-American comparative studies on educational and psychological issues. "The time is right for major advances in deafness research in Israel," Zwiebel said. "The attention of many individuals and agencies has now been successfully focused on problems of deafness, especially deafness in childhood."

Jose Carlos Lassi Caldeira, M.D., is coordinator of Programs for Assistance to the Physically and Mentally Handi-

capped in Minas Gerais, Brazil. He is also director of FONO, a combination clinic and school in Minas Gerais that currently serves about 120 deaf children. Caldeira plans at the CSEHD to give special attention to research on cognitive and linguistic development, family environment, literacy, classroom communication and achievement. He will carry out similar work when he returns to Brazil where his responsibilities put him in a unique position to initiate educational programs and research of great potential benefit to

Serendipity

Library Bits & Pieces

SDI service

by Sandy Tiemann

SIRE is the library's in-house computerized catalog. One of SIRE's files is called "Newbooks" (Newbks). This file contains a listing of books and other materials recently added to the library's collection. By using the "Newbooks" file, the library is able to offer a service of Selective Dissemination of Information (SDI) to faculty, researchers and administrative staff.

An SDI is a computer printout of the library's new materials limited to your area of special interest. Call numbers are included. You will receive updates of this printout on a periodic basis.

Request forms for an SDI are

available at the Information Desk. A part of the form asks for a listing of keywords related to your interests. For example, a faculty member researching applications of the personal computer might list minicomputers, microcomputers, home computers and personal computers as key words.

The librarian devises a search strategy based on these key words and other applicable terms. As your area of interest changes, a new SDI profile is developed.

An awareness of materials in your topic area will allow better use of library resources. For more information, contact Sandy Tiemann in MW11 at x5930 (voice) or x5575 (TDD).

Pre-schoolers at KDES watch closely as their teacher, Mary Beth Graham, shows them a teddy bear whose eyes light up in response to sound. Harriett Alexander-Whiting, speech and language pathologist at the school, requested the bear primarily for use in evaluations but gives up custody to the Younger Playroom when the bear is not being used for testing. The bear was created and donated by the Telephone Pioneers of America, part of the Alexander Graham Bell Society, Chapter 15.

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. More details on these and other programs of interest can be obtained from the Office of Sponsored Research, x5030 (voice or TDD).

Deadline Program

05/01/84	HRSA: Maternal and Child Health Discretionary Grants
05/08/84	ED: Centers for Special Need Children
05/08/84	ED: Vocational Rehabilitation Services to Severely Disabled Individuals
05/21/84	NIHR: Field-Initiated Research Projects
05/21/84	ED/OSERS: New Field-Initiated Research Projects
06/01/84	HHS: Grants for Family Planning Services
06/04/84	ED: Educational Media Research for Handicapped Persons
07/01/84	NIA: Social Environments Influencing Health and Effective Functioning in the Elderly

Research on deafness

The Deafness Research Foundation is accepting applications for new research grants to advance the understanding of the causes, treatment and

prevention of hearing loss and other ear disorders. The deadline date of July 15 remains the same each year.

Research may be directed at any aspect of the ear such as function, physiology, biochemistry, genetics, anatomy or pathology. The sponsor favors projects directed by new investigators and seed money support for unexplored areas of research but does not exclude support for new research.

Grants are made only to non-profit, tax-exempt, public or private institutions in the continental United States or Canada. Awards are made for one year with renewals up to three years possible. A grant cannot exceed \$10,000 for one project year to begin Jan. 1, 1985.

Funds may be used for the salaries of technical and supporting personnel, limited alteration and renovation of existing facilities, equipment purchase, supplies including drugs and services, other expenses essential to the project and indirect costs up to 10 percent of the total project costs.

Funds may not be used for the salary of the principal investigator or coinvestigator, travel, living expenses, printing costs or public information or education programs.

For further information, please contact the Office of Sponsored Research or Deafness Research Foundation, 55 East 34th Street, New York, NY 10016, (212) 684-6556.

Gil Delgado, assistant vice president of Academic Affairs and dean of the Graduate School, makes a presentation during a seminar for the Council for Hearing Impaired Visits and Exchanges (CHIVE). The group from England was on campus April 8-28.

Law-related fields explored in seminar

A pilot seminar designed in part to afford Gallaudet students more exposure to law-related careers is being conducted this semester by the Office of Experiential Programs Off Campus.

Selected students interested in criminal justice, juvenile justice and law are taking part in the seminar led by Bill Delaney, a civil rights attorney with the U.S. Department of Education and a former attorney with the National Center for Law and the Deaf.

The Jeffrey I. Saloshin seminar was established in January with money from the Jeffrey I. Saloshin Memorial Fund. That fund was created by the former student's mother in memory of her son, a 1979 Gallaudet graduate who died last year. Sylvia Kleiman asked the College to spend the money she donated to keep her son's memory alive.

Developed by Lillie Ransom, coordinator of Cooperative Education at EPOC, the pilot seminar was created because of Saloshin's interest in criminal justice.

Three students—Tonia Feith, Mark Geiger and Kathy Kasperek—are participating in the seminar. They spend two hours a week in class and eight

more hours a week working at the Capital Legal Foundation where they are doing research for the libel case, General Westmoreland v. ABC. Field trips, consisting of visits to trials, penal institutions and the like, are also part of the learning experience.

Ransom said the purpose of the seminar is threefold: to give interested students a more realistic idea of what law-related careers entail, to give professionals in the criminal justice/law fields exposure to deaf persons and to give students undecided about vocational choices a vehicle in which they can investigate law-related careers.

The class covers a wide variety of topics so that the students will be exposed to various parts of law and the legal process, according to Delaney, who added that he hopes the seminar will "encourage more deaf students to get involved" in these careers.

The class covers a wide variety of topics so that the students will be exposed to various parts of law and the legal process, according to Delaney, who added that he hopes the seminar will "encourage more deaf students to get involved" in these careers.

At least one of the students is planning to do just that. Tonia Feith, a senior government and communication arts major, said she has always been interested in learning more about the legal process and would like to one day become an attorney.

The seminar will be offered every other spring semester, with the next one planned for the spring of 1986,

Ransom said. The memorial fund will be used next spring and every other

spring thereafter to provide a scholarship for one Gallaudet student.

Day care program

continued from page 1
allow hearing and deaf children to socialize and integrate."

The recruitment process should begin shortly, Hines said, noting that the day care coordinator should be on board in early June.

Forty children will be accepted into the program on a full-time basis when it first opens, with 80 children eventually to take part. Children will be accepted into the program on a first come basis by age group. Washington, D.C. government regulations place maximum occupancy in the Appleby Building at 80 children.

Plans are now in the works to renovate the building. The Physical Plant Department is now seeking bids for outside contractors to bring the building into conformance with regulations set forth for the operation of day care centers by the D.C. government.

The bulk of the necessary work involves plumbing. Gallaudet's Physical Plant Department will also work on the building to bring it into compliance with regulations.

Pre-registration for the program is scheduled in June, with registration set for August. Exact dates and hours of operation will be announced in the future.

5/23	Vocational/Educational Conference	Lakewood, NJ	PC

Advocacy Notes

Annual report on P.L. 94-142

by Merv Garretson

In submitting to Congress its sixth annual report on the implementation of P.L. 94-142, the Office of Special Education and Rehabilitative Services (OSERS) gives the following statistics for the 1982-1983 school year.

- Total number of disabled children, ages 3-21, served under P.L. 89-313 and P.L. 94-142: 4,298,327
- Number of hearing-impaired children: 75,337
- Number of deaf-blind children: 2,553

The largest categories of disabled children are the learning disabled, the speech impaired, mentally retarded and emotionally disturbed, which account for 93 percent of the total. Deaf and hard of hearing children represent three percent of the group.

Madeleine Will, assistant secretary for OSERS, notes that the data in the report reflects "steady improvement in the provision of educational services to handicapped children." The three areas where she feels further improvement is needed are listed as 1) expansion and improvement of services to younger handicapped children; 2) serving more handicapped children in the least restrictive environment with the maximum integration appropriate and 3) improvement of preparation for the transition of adolescents from school to work.

The report points to "dramatic reduc-

tions" in the enrollment of handicapped children in state institutions.

(Presumably a residential school for the deaf is considered a state institution.) Many states have adopted policies to keep or return students to their home communities whenever possible. LEAs "have increased" their resources to assist with previously institutionalized students. It was noted that the number of handicapped children supported in local education programs has increased 700 percent since 1975.

The report states that fewer than seven percent of all handicapped children are educated in either separate schools or separate environments. Of the more than 93 percent enrolled in regular public schools, about two-thirds receive their education in the regular classroom with non-handicapped peers.

The report states "the administration is recommending no changes in the Act or in the rules governing the Act. Instead, the Department will provide technical assistance to help states and localities with problems arising from the current rules. The Department is currently formulating the regulations which will implement the Education of the Handicapped Amendments of 1983."

It is obvious from this report that the OSERS will continue to push mainstreaming and that they do not fully understand the implications of "the least restrictive environment" as it relates to deafness. As French sociologist Bernard Mottez says of mainstreaming: "Is it necessary to drown deaf children?"

Workmen ready Drake House to be razed. The building, also known as House 7-8, was constructed more than 100 years ago. In addition, two temporary trailers behind the structure are scheduled to be torn down.

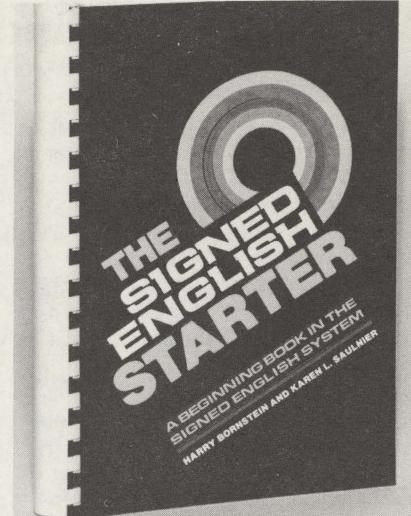

Conference discusses accessibility

Several Gallaudet employees travelled last month to Williamsburg, VA, to take part in an international conference featuring a session on access for handicapped people.

The Fourth Annual Conference of the Association on Conference and Events Director International (ACED-I) was held March 20-23 and attracted 70 persons from colleges and universities across United States and Canada who coordinate conferences and other activities at their schools.

The conference was comprised of three themes, which were discussed in lectures and workshops on different days. In addition to the session on accessibility, a session on management and another on events and conferences on campuses were also discussed.

Boris Bogatz, assistant dean of the School of Education and Human Services at Gallaudet and an ACED-I board member, chaired a panel which dealt with the issue of accessibility for handicapped persons. During this time, he touched on the importance of ac-

"The Signed English Starter" is one of two books recently released by Gallaudet College Press.

Gallaudet Press releases two titles

A first course in Signed English and the second volume in the Deaf Storytellers Series are the newest publications from Gallaudet College Press.

"The Signed English Starter" is a spiral-bound 240-page book containing signs for 940 common words in American English. The illustrated signs are arranged in 12 topical chapters ranging from people and pronouns to time and money.

"Another Handful of Stories" is a collection of 37 tales of fact and fiction told by 24 deaf storytellers. Each chapter in the paperbound book corresponds to a videocassette of the authors signing their stories.

In both formats, the stories are used for entertainment as well as education. The first volume in the Deaf Storytellers Series, "A Handful of Stories," continues to be used in reading and sign language classes and by deaf clubs and associations.

Because most of the contributors to both volumes are faculty and staff members at the College, MSSD and KDES, the book has extra appeal on campus.

The books are available at the College Bookstore. Information on the videocassette can be found in the Press's 1984 catalog or by calling x5595 (voice) or x5276 (TDD).

Tickets still available for 'Godspell'

Tickets are still available for MSSD's production of "Godspell." The campus community is encouraged to make reservations for the May 10-19 performances soon, as many are expected to sell out.

Evening performances at 8 will be

National Very Special Arts Festival

continued from page 1

pull off an undertaking of this size.

In addition to serving as host site, Gallaudet will be well represented at the Festival itself. The Gallaudet Dancers will perform and conduct a workshop for Festival participants. Two Kendall students, Brian Morris and Raychelle Harris, are representing the District of Columbia at the Festival and a number of MSSD students will get an opportunity to perform on stage at the John F. Kennedy Center for the Performing Arts in front of a national audience of students and celebrities.

Gallaudet can be especially proud of MSSD junior Terrylene Theriot from Chicago who has won a national competition in playwriting with her one-act script, "Imagine." Through the NCAH's Integrated Young Playwrights Project, Terrylene's winning play will be produced and performed by professional actors at the Kennedy Center on May 25 during the Festival.

The Festival itself brings together more than 750 disabled and nondisabled students and adults from across the United States and abroad for four days of performances, arts exhibits and workshops at the Kennedy Center. Many celebrities, including the Alvin Ailey Dance Project, singers Ronnie Milsap, Placido Domingo, actor Henry Winkler and artists Andy Warhol and Jamie Wyeth, will donate their time and talents by entertaining or conducting workshops. The National Committee conducts arts programs in all 50 states, the District of Columbia and Puerto Rico—Involving more than one half-million disabled persons. In 1984, over 400 local Very Special Arts Festivals are projected to be held throughout the nation. The Festivals and other programs serve to highlight NCAH's belief that the arts are universal and that all people in the world should be allowed access to opportunities for learning, creativity and achievement through the arts.

This year in conjunction with the Festival, the NCAH is co-sponsoring an International Seminar on Arts and the Handicapped with the Organization of American States (OAS). More than 100 representatives from 45 different countries are expected to attend and will be touring the Gallaudet campus as part of their visit.

Gallaudet has been working with the Festival committee in the following

ways:

— Dan Bryant and Bonnie Mann have coordinated a team from Business Services to deal with the many details involved with housing, food services and use of the Gallaudet facilities.

— Susan Watson and Loraine Dipietro are planning arrangements for the added influx of international visitors and student participants who have requested tours of the campus. Volunteers to help out with tours will be welcomed and those interested should contact the Visitors Center at x5703.

— Joan Fergerson of the Alumni/Public Relations Office is representing Gallaudet on the Festival planning committee as its public relations liaison. The entire Public Relations staff is gearing up to handle increased media relations activities during the Festival to assure the greatest visibility for Gallaudet.

— The TV Center will be providing technical support in a number of areas.

— Dr. Jerry Lee and his wife, Joan, will be representing Gallaudet at the many activities at the Kennedy Center, a press conference and will host the closing ceremonies to be held at Gallaudet on Saturday.

On the Green will be sharing additional information with the campus community about the Very Special Arts Festival in upcoming issues. For more information contact the VSAF Office on campus at x5755 or Joan Fergerson at x5298.

Volunteers needed

Volunteers are needed to provide technical and personal assistance to the Very Special Arts Festival participants, especially on Thursday and Friday, May 24 and 25. At that time, the need for mobility aids, interpreters (sign language and foreign language), and other assistance will be at a premium.

Although volunteers with experience working with disabled individuals are desired, the major qualification is willingness to help. NCAH will provide training and orientation before the event.

Anyone interested in volunteering should contact Maureen Gavaghan at 332-6960 or 293-3989 (voice and TDD).

Visiting scholars involved in research

continued from page 1
deaf Brazilian children.

Nancy Taylor is on one year's sabbatical from the Catholic University of America where she is an associate professor in the School of Education. At Catholic University, she has studied the effects of "word-rich" environments on the development of reading skills among hearing children. At the CSEHD she is working with Carolyn Ewoldt and other research faculty on a study of the special factors affecting deaf children's ability learning to read. She will investigate the effects of altered environments and teaching strategies on these children's emerging literacy skills.

Frieda Hammermeister, professor of special education at the University of Pittsburgh and coordinator of its graduate program for education of the hearing impaired, is also devoting sabbatical time to research with Carolyn Ewoldt on hearing impaired children's

acquisition of reading skills.

Hammermeister believes reading instruction should be an integral part of language arts development, a non-compartmentalized approach to teaching in which emphasis is placed on a wide range of language skills, including comprehension of both written English and sign language. At the CSEHD she is investigating ways educators can implement such an approach.

Questions about the work of these visiting scholars should be directed to the Center for Studies in Education and Human Development, KDES, or should be made by phoning x5081.

Peace Corps notice

Peace Corps volunteers who have returned from their assignments are asked to contact the International Center on Deafness before May 4. Please call Karen King at x5316 (voice or TDD).

Debby Sampson throws the shotput at the first home track meet of the season. The meet was won by Stevens Tech, with 77 points. Gallaudet finished last.

Awareness Week observed in April

Members of advocacy groups for deaf and hearing impaired persons attended ceremonies April 11 at the U.S. Capitol to mark National Hearing Impaired Awareness Week. Congressman Frank Guarini (D-NJ) and Senator Jennings Randolph (D-WV) were the prime sponsors of legislation calling for the observance, which was held April 8-14.

The April 8 beginning date marked the 120th anniversary of Gallaudet College. Along with Gallaudet, other groups which actively supported the measure included the Disabled American Veterans, the American Speech-Language-Hearing Association, the National Captioning Institute and the Registry of Interpreters for the Deaf.

Students needed to participate

Members of this year's graduating class at Gallaudet are needed to participate in a national study entitled "National Project on Higher Education for Deaf Students." As part of the project, students are asked to complete a brief questionnaire dealing with college experiences and career or educational plans.

Three project staff members from the Arkansas Rehabilitation Research and Training Center on Deafness and Hear-

ing Impairment will be on campus through Wednesday, May 2 to administer questionnaires and explain the project. All information will be kept confidential.

To participate, students should go to Hall Memorial Building, Room 213, at any of the following times: May 1, 8 a.m., 10 a.m., noon, 2 p.m., 4 p.m. and 7 p.m.; May 2, 9 a.m., 11 a.m. and 1 p.m.
